## Showing Date posted in jxshowjob

Posted by partha06 - 2007/06/07 22:56

---

Hi all,

I want to show, Date Posted, function. in jxshowjob module.

I did Following changes, in mod\_jxshowjob.php file, & mod\_jxshowjob.xml file

Chage in mod\_jxshowjob.php file,

```
// add row name ,
```

```
$query = "SELECT id, title, hits, description,created"
```

```
// add follwing line
```

```
<td width="11"><?php if ( $params->get( 'showcreated' ) ) { echo "<br />$row->created"; } ?></td>
```

```
// add following line in get params definitions
```

```
$params->def( 'showcreated', 0 );
```

And in xml file;

```
<param name="showcreated" type="radio" default="0" label="Date Posted" description="Show the created with each item (default no)">
  <option value="0">No</option>
  <option value="1">Yes</option>
</param>
```

But it does not showing.. Please help me..

Thanks

Partha

Hi,

After going thru the code modifications, i feel everything is right and fine.

for debugging purpose just delete then code you added in the xml file and the 'if' conditional clause from corresponding php file like and go for a plain code{ echo "<br />\$row->created"; }. And see whether it is working or not.

OR

Just replace the field name 'showcreated' to 'showdate' or something like that...and test.

## Re:Showing Date posted in jxshowjob: solved

Posted by partha06 - 2007/06/08 10:10

Hi , greg,

Issue solved..

There was some error, in my system .so it was not working, now i keep Same xml file,

```
<param name="showcreated" type="radio" default="0" label="Date Posted" description="Show the number of Created to this item (default no)">
  <option value="0">No</option>
  <option value="1">Yes</option>
</param>
```

is working now for me without deleting..

Thnaks

Partha

Thanks;) ;)

hi geg,

from this code, it is also create options in admin, so u can want to show " Date Posted" or not in frontend. one thing is happing there that, it also, show " Time of post". along with date.. I donot know, how to disable it.. any idea?

thanks

partha

Hi,

I think you can do it by formating the 'created' field using using the function -mxFormatDate( \$row->created, \$cfgjl ) where the second parameter is the format in which you want to dipaly the date. And for specifying your format use the

---

strftime() syntax.

Hope, may be this will help you(not sure, anyway give a try. cheers:)

Bye:cheer:

Hi,

Make change in the file 'mod\_jxshowjob.php' file, where replace your code `<td width="11"><?php if ( $params->get( 'showcreated' ) ) { echo "<br />$row->created"; } ?></td>`

with say,

`<td width="11"><?php if ( $params->get( 'showcreated' ) ) { echo ' <br /> '. mosFormatDate( $row->created, '%B %d, %Y' ); } ?></td>`

that's all, Try and check it..

Hope your problem will be solved :)

Bye:cheer:
