
HELP!! Navigating administrator pages in backend!

Posted by jmalouff - 2008/11/13 23:51

When i attempt to navigate though the jobline posting section using the administrator backend. i am unable to change pages.. When I click to go to page 2 it does nothing.. just sits there..

I am also having issues with "joe's" showing up as "joe\\s" so and punctuation like apostrophe shows up as \\ or -

HELP!!

The Extension is awesome minus these two issues.. Anyone else have these issues or have fixes? :(:(:(http://www.jxdevelopment.com/images/fbfiles/images/apostrophe_issue.gif

Never heard of this. Which versions of Joomla and Jobline are you running, and which browser? Could you also check if you get any javascript errors when loading the page or clicking the link?

I am also having issues with "joe's" showing up as "joe\\s" so and punctuation like apostrophe shows up as \\ or -

This probably means that I've forgot to check the PHP magic quotes setting before running addslashes somewhere. On which pages does this happen, and in what fields?

in Firefox

Fehler: document.adminForm.limitstart is undefined

File: <http://.../index2.php>

Line: 1

I too am having this issue. I am running Joomla 1.5.9 and Jobline 1.1.3.1 . PHP version 5.2.5 and MYSQL 5.0 . I would be willing to pay for development of 1.2 . If you are interested, please email me.

Got this sorted. Apparently it is a legacy issue with 1.5.X and pagination. I added

and now it seems to work.

Yeah, I've got this fixed in my dev version as well. Will try to get a release out which fixes this.

How do we fix this problem? where would that code go?

Thanks in advance

I still do not have a solution to this problem, can someone please help.

Thank-you

Found It! At least it's now working on my webserver :

You'll have to modify the file : administrator / components / com_jobline / admin.jobline.html.php

In the function listJobPostings you will have to add the line "" just after ""

Have fun!!!

Kind regards,

Mark
