## Change or edit date posted

Posted by aadjeh - 2008/12/08 21:35

---

Hi there!

I have a question about the latest Jobline release in Joomla 1.5.x

I wish to edit the date created/posted or change it in date edit or changed or saved.

For example: I have a job, witch already is a long time present on my site, I'd like to renew it without making the same jobposting all over again. So I edit my posting and save it. The date on the site is still the first posted date. I like to see the new posted date now.( or a date of the edit)

Is there a way?

This is available in Jobline v1.2, but can't be done easily with the current available version.

You'd basically have to edit the db table to fix it. If you email me login info to phpMyAdmin or something similar I can do it for you.

Hi

i have the same problem,  
can you explain what fild i have to change in the DB so i can do it myself?

p.s , is the 1.2ver available for beta test?

---

thanks

avrik

I have the same issue. It looks like I have Version: 1.1.2.2. Is there a way to do it with this version or should I upgrade?
