## Mamblog and Joomla 1.5

Posted by Rudy24 - 2009/07/02 05:36

---

Hello

Will Mamblog run on Joomla 1.5? I am thinking of upgrading from 1.0.15 to 1.5 but don't want to lose Mamblog.

Cheers  
Rick

It's being worked on, but there's no ETA on when it will be finished.

{bump}

Joomla 1.5.x has been out for years. It's a beautiful format, and I would love to see Mamblog back in action for Community Builder 1.2.1 also. The plugin is already installed, and they are just waiting for ya to come out with a compatible component.

I don't know your list of priorities, but this is important. Maybe delegation is in line?

same here. Site really needs updating, but no Mamblog :ohmy:  
Any indication of when we might expect this would be very welcome. I just want to know if I should wait any longer or make my own quick fix.

Thanks for Mamblog!
